PROFILE

MSIS candidate with hands-on experience building agentic AI systems and LLM-powered applications to automate real-world workflows. Combines cloud operations and service delivery experience with AI-driven problem solving to improve efficiency, decision-making, and service outcomes. Seeking internship for summer 2026.

EDUCATION

Master of Science in Information Systems (Cybersecurity)
Baylor University - Waco, Texas | Expected: December 2026

- **Relevant Coursework**: Information Security, Information Systems Analysis & Design, Cybersecurity Technology Factors, Cybersecurity Policy and Planning, AI Principles and Applications, Object-Oriented Business Programming with Python, Database Management Systems.

Bachelor of Science in Information and Communication Technology
Presbyterian University - Okwahu, Ghana

PROJECTS & IMPLEMENTATIONS

AI Service Desk Triage Agent *(n8n, LangChain, LLM, Storage, Human-in-the-Loop)*

- Designed a multi-agent AI system to automate IT service desk ticket classification, prioritization, routing, and resolution recommendations, incorporating human-in-the-loop for high-risk cases to improve accuracy and efficiency

AI Multi-Agent Development of Handyman Operations Desk (n8n, APIs, LLM, Storage, Human-in-the-Loop)

- Designed and deployed a multi-agent system using n8n and Gemini 2.5 Flash to automate task routing and decision-making, reducing manual intervention and improving workflow efficiency

Security Controls Policy Development (NIST 800-53, ISO 27001, CIS Controls, Risk Assessment)

- Developed NIST 800-53/ISO 27001-aligned security controls and conducted CIS Controls analysis for security posture assessment

Database Design & Data Modeling (SQL, ERD, MS Visio, Normalization, Data Integrity)

- Designed and implemented normalized relational database schemas and ER models for an organisation to improve organizational data with role-based access control, user authentication, and audit logging

SKILLS

AI & Automation: Agentic AI Systems, LangChain, RAG Architecture, n8n, LLM Applications, AI Framework Evaluation
Programming & Data: Python, SQL, JavaScript, Django, Git/GitHub,
Cloud & DevOps: AWS, Azure, Linux, CI/CD Pipelines
IT Operations & MSP: Service Desk Workflows, Incident/Change Management, SLA Monitoring

PROFESSIONAL EXPERIENCE

Student Success Support Specialist (Graduate Student Worker)
Baylor University, Waco, Texas |January 2025 – Present

- Built Power BI dashboards and SQL-based reporting to track KPIs and improve operational decision-making efficiency by 28%
- Utilized Navigate360 AI and analytics features to analyse student health data, generating insights that improved engagement and health metrics by 30%

Operations Analyst
Amazon Web Services - South Africa | May 2022 – June 2024

- Managed service delivery across compute and storage domains, handling support cases, guiding engineers on complex tickets, and driving prioritization and escalation to maintain 99.9% SLA uptime
- Acted as an escalation point for high-impact incidents, coordinating cross-functional teams and managing customer communication to ensure timely resolution and service reliability

IT Operations Analyst
Global Wavenet, Sri Lanka | December 2018 – May 2022

- Managed delivery and operational support of telecom solutions for enterprise clients, coordinating cross-functional teams to ensure reliable service performance and SLA compliance
- Supported implementation and change management activities across environments, collaborating with stakeholders to ensure smooth deployments and operational stability

CERTIFICATIONS

- AWS Certified AI Practitioner | ITIL v4 Foundation | CompTIA Security+ Certified | ISC Certified in Cybersecurity
